PROFESSIONAL SUMMARY

Software Engineer who shipped a production RAG platform serving 50+ internal users and cutting cloud API costs by 40%, built a Python pipeline processing 2.5M+ log rows in minutes, and delivered full-stack products that cut manual work by up to 90%. Computer Science graduate (86%, High Distinction) with hands-on experience across full-stack web, AI/LLM systems, automated testing, and cloud (Azure, GCP, AWS).

RELEVANT EXPERIENCE

Software Engineer in Test - Remote

May 2026 - Present

Vretta

Toronto, ON

- Designed and shipped a Python/pandas log-analysis pipeline that processes ~2.5M scoring-traffic rows in 3-5 minutes, sessionizes scorer activity, and flags anomalous behaviour, now a reusable cheat-detection tool in the team's shared repo.
- Diagnosed and fixed a silent data-loss defect in an AI-driven log-splitting process dropping rows from a 2M+ row dataset, rebuilding it into a lossless, time-sorted batching pipeline with per-scorer grouped output.
- Built and maintained automated UI and API test suites integrated into the daily workflow, and identified multiple platform security vulnerabilities later confirmed by the development team.

Lead Software Engineer - Remote

Oct 2025 - Present

Arts Factory Society

Vancouver, BC

- Built Carbon Accounting Software in React, Vite, and Tailwind CSS with a dynamic form system across 18 configurations and modular UI components for a crowdsourced material library and component builder.
- Engineered scalable data architecture with Firebase Firestore and an automated calculation engine that reduced manual estimation time by 90%, integrating third-party ICE Database APIs over RESTful services for real-time carbon calculations.

AI Engineer - Remote

Aug 2025 - Apr 2026

Vosyn

Toronto, ON

- Architected and deployed a production local RAG pipeline using FastAPI, PostgreSQL/pgvector, Docker, and Ollama across 10,000+ indexed chunks, reducing cloud API costs by 40% while holding sub-5-second query resolution.
- Built Vosyn Insights, an AI-powered enterprise assistant in React (TypeScript) with 15+ modular components, owning end-to-end development through full-stack RAG integration with role-based permissions for 50+ internal users.
- Automated business workflows with Power Automate and n8n, cutting HR letter generation from 15 minutes to under 2 and eliminating 15 hours/week of manual email scheduling across 500+ active leads.

Full Stack Developer - Insurance Policy Software

Sept 2024 - Apr 2025

BFL Canada

Kelowna, BC

- Developed a React/Node.js/Express web application with a MySQL backend to automate policy creation and comparison, reducing manual review time by 80% for 100+ monthly documents.
- Architected an AI-driven discrepancy detection pipeline using GROBID for text extraction and Levenshtein-distance algorithms to reach 90% accuracy, and built end-to-end Playwright/Jest tests boosting coverage to 60%.

Software Engineer Intern

May 2024 - Aug 2024

Microsoft Cloud Solution Partner, Getmax.ae

Dubai, UAE

- Developed web and API projects on Microsoft Azure and Dynamics 365, integrating CRM and ERP systems to streamline client operations.
- Leveraged Azure DevOps for source control and CI/CD pipelines and helped implement Azure Security Center policies and role-based access controls, reducing security incidents by 15%.

SKILLS

- Programming Languages:** Python, JavaScript, TypeScript, Java, C#, SQL, HTML, CSS, R
- Frameworks & Libraries:** React, Node.js, Express, Vite, Tailwind CSS, FastAPI, Playwright, Jest, Pandas, NumPy, PyTorch, TensorFlow
- Databases & AI:** MySQL, MongoDB, PostgreSQL/pgvector, Firebase Firestore, RAG, LLMs, Ollama, GROBID
- Cloud & Tools:** Microsoft Azure, Google Cloud Platform, AWS, Docker, GitHub, Azure DevOps, CI/CD, Power Automate, n8n
- Soft Skills:** Ownership, Clear Communication, Collaborative, Detail-Oriented, Adaptable, Curious, Open to Feedback

EDUCATION

Bachelor of Science – Computer Science

September 2021 – May 2025

University of British Columbia

Kelowna, BC

Grade – 86% (High Distinction) | Awards – Dean's List (2021, 2023, 2024), Deputy Vice-Chancellor Scholarship (2022)
