PROFESSIONAL SUMMARY

Removed about 15 hours a week of manual email scheduling with n8n and cut HR letters from 15 minutes to under 2 with Power Automate. Works directly with stakeholders to turn repetitive work into tested automation in Python, TypeScript and React.

RELEVANT EXPERIENCE

Software Engineer in Test – Remote May 2026 – Present
Vretta Toronto, ON

- Built a Python/pandas cheat-detection pipeline with Claude Code that sorts scorer activity into training, qualifying and scoring sessions and flags anomalies across 2.5M log rows in 3 to 5 minutes.
- Selected for a new 3-person team building Vretta's first end-to-end test automation framework, and built its Alberta Playwright UAT suite solo with a Page Object Model and auth fixtures.
- Audited 6 months of a teammate's manual TestRail testing and reported which repetitive checks to automate.
- Replaced an AI log splitter that was silently dropping rows with a lossless batching pipeline for 2M+ log rows.

Product Engineer – Part-time Remote Oct 2025 – Present
Arts Factory Society Vancouver, BC

- Owned the carbon accounting software end to end as first technical hire, from stakeholder requirements through CI/CD.
- Replaced manual carbon estimation with an automated calculation engine on Firebase Firestore that converts material volumes to carbon across a 5-tier data hierarchy, cutting estimation time by roughly 90%.
- Built the React, Vite and Tailwind front end and the API integration between the ICE Database and Firebase for real-time carbon footprint calculations.

AI Engineer May 2025 – Apr 2026
Vosyn Toronto, ON

- Built an n8n workflow automation for the sales team's outreach with configurable follow-up cadences, attempt thresholds and per-lead pause/resume, removing about 15 hours a week of manual email scheduling.
- Built a lead management layer over Google Sheets and Drive for 500+ active leads with a three-bin priority model and full send history, cutting per-campaign setup from 2 hours to under 10 minutes.
- Built HR letter process automation in Power Automate across Microsoft Forms, SharePoint, Excel and Word, cutting turnaround for the HR team from 15 minutes to under 2 per request.
- Owned Vosyn Insights, an internal AI assistant used by 50+ employees, building its 15+ component React/TypeScript app from Figma and the client layer that connects it to the platform team's self-hosted RAG service.

Co-Founder & CTO Aug 2024 – Aug 2025
NxtMeals Vancouver, BC

- Surveyed 100+ students and ran 3 focus groups to shape a go-to-market plan for a $200M addressable market.
- Launched a Wix prototype with 50+ beta signups in 3 weeks and piloted 50 loyalty cards with local grocers.

Insurance Policy Automation for BFL Canada – Capstone Project

- In a team of five, built a React, Node.js and Express app on MySQL that automates policy creation and comparison for BFL Canada, cutting manual review time by roughly 80% across 100+ documents a month.
- Designed a discrepancy detection pipeline using GROBID text extraction and Levenshtein-distance matching that caught about 90% of seeded discrepancies between policy versions.
- Wrote Playwright UI and Jest API end-to-end tests, reaching about 60% coverage before deployment.

SKILLS

- **Workflow & Process Automation:** n8n, Power Automate, Microsoft 365, SharePoint, REST APIs, Firebase, Firestore
- **Languages:** Python, TypeScript, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Node.js, Express, Vite, Tailwind CSS, pandas, NumPy
- **Testing:** Playwright, Jest, TestRail, end-to-end and API testing
- **Cloud & Tools:** Azure DevOps CI/CD, Microsoft Azure, AWS, Cloudflare, GitHub, Claude Code

EDUCATION

Bachelor of Science – Computer Science September 2021 – May 2025
University of British Columbia Kelowna, BC
Grade – 86% (High Distinction) | **Awards** – Dean’s List (2021, 2023, 2024), Deputy Vice-Chancellor Scholarship (2022)
