Toronto, ON

## PROFESSIONAL SUMMARY

Computer Science graduate from UBC with 2+ years of full-stack development experience and hands-on expertise deploying production-ready LLMs on cloud platforms. Proficient in Python, Java, and JavaScript with practical experience in AI-driven automation, RESTful API development, and cloud infrastructure (GCP, Azure). Self-directed problem-solver with strong organizational skills and a growth mindset, eager to leverage AI to transform how organizations learn and operate.

## RELEVANT EXPERIENCE

### AI Engineer – Part-time Remote

Aug 2025 - Present

Vosyn

Toronto, ON

- Deployed a production-ready Large Language Model on Google Cloud Platform using vLLM and Docker, architecting scalable AI infrastructure that handles concurrent requests while ensuring enterprise-grade data privacy and control.
- Built an AI-powered React (TypeScript) chatbot with distributed REST API integration, owning end-to-end development from prompt engineering and model integration through production deployment.
- Designed automated document generation using Microsoft Power Automate, integrating Forms, Excel, and Word to streamline internal processes, reducing HR letter generation time from 15 minutes to under 2 minutes per request.

### Lead Software Engineer – Part-time Remote

Oct 2025 - Present

Arts Factory Society

Vancouver, BC

- Developed a full-stack Carbon Accounting platform using React, Vite, and Tailwind CSS, building a dynamic form system with 18 geometric configurations and modular UI components for crowdsourced material estimation.
- Engineered scalable data architecture with Firebase Firestore implementing a 5-tier hierarchy and automated calculation engine, reducing manual estimation time by 90% while maintaining data accuracy.
- Integrated third-party RESTful APIs with Firebase cloud services to enable real-time carbon footprint calculations across complex multi-tier data relationships.

### Full Stack Developer - Academic Project

Sept 2024 - Apr 2025

BFL Canada

Kelowna, BC

- Developed a React/Node.js/Express web application with a MySQL backend to automate policy creation and comparison, reducing manual review time by 80% for 100+ monthly documents.
- Architected an AI-driven discrepancy detection pipeline leveraging text extraction and Levenshtein-distance algorithms via AI APIs, achieving 90% accuracy in identifying policy changes.
- Conducted end-to-end testing with Playwright (UI) and Jest (API), boosting test coverage to 60% and preventing production defects prior to a live client deployment.

### Software Engineer Intern

May 2024 - Aug 2024

Getmax.ae (Microsoft Cloud Solution Partner)

Dubai, UAE

- Utilized Microsoft Azure to develop and integrate CRM/ERP systems via Microsoft Dynamics 365, streamlining operations and improving cross-team delivery velocity across web and API projects.
- Leveraged Azure DevOps for source control, project tracking, and CI/CD pipelines, cutting deployment time and boosting development efficiency for two production applications.
- Developed Azure Security Center policies, role-based access controls, and threat protection measures, ensuring cloud compliance and reducing security incidents by 15%.

### Data Analyst Intern

May 2022 - Aug 2022

Tridel Technologies

Dubai, UAE

- Engineered Python data pipelines using Pandas and NumPy to process 20,000+ environmental sensor records, uncovering data-driven trends for monitoring projects.
- Developed ETL workflows to clean and standardize data from monitoring stations, reducing inconsistencies and cutting preprocessing time by 15%.
- Designed 2 interactive Tableau dashboards that visualized ecosystem metrics for 4+ stakeholders, accelerating decision cycles and informing project direction.

## SKILLS

- **Programming Languages:** Python, Java, JavaScript, C#, SQL, HTML, CSS, R
- **AI & Machine Learning:** Large Language Models (LLMs), PyTorch, TensorFlow, Prompt Engineering
- **Frameworks & Libraries:** React, Node.js, Express, Vite, Pandas, NumPy, Playwright, Jest
- **Databases:** MySQL, MongoDB, NoSQL, Firebase Firestore
- **Cloud & DevOps:** Google Cloud Platform, Microsoft Azure, Azure DevOps, Docker, GitHub, Cloudflare
- **Soft Skills:** Self-Directed, Growth Minded, Collaborative Communicator, Organizational Skills, Open to Feedback

## EDUCATION

Bachelor of Science – Computer Science

September 2021 – May 2025

University of British Columbia

Kelowna, BC

Grade – 86% (High Distinction) | Awards – Dean’s List (2021, 2023, 2024), Deputy Vice-Chancellor Scholarship (2022)
